ON THE COVER:
Atlanta store associate Danny Watson has been with The Home Depot for 21 years and served as a Team Depot project captain for 16 years. His gardening helpers are Sabrina Dimson, 11, and Stanley Mayer, 5, both children of associates.
OVERVIEW

Resources

> Targets & Performance
> Resources & Reports
> Corporate Responsibility
Running a responsible and sustainable business is foundational for The Home Depot. It reflects the core values upon which our company was built and the entrepreneurial spirit that allows us to thrive in a changing marketplace. It also reflects our view of what success will look like for our company, our communities and our planet in the years to come.

We organize our approach around three key pillars:

**Focus on People**

This Responsibility Report details the daily work we do to support these three pillars, as well as the progress we made in 2018 thanks to the dedication and ingenuity of our associates and suppliers. You’ll discover high- and low-tech innovations. For example, materials engineering allowed us to eliminate enough PVC film from our private-brand packaging to cover 28 football fields, while a simple-but-smart training change led to a 7% reduction in injuries among our new hires.

You’ll learn more about how we strive to create a work environment that’s inclusive, engaging and rewarding to associates. Our workforce of over 400,000 people is more ethnically diverse than the U.S. working population. Our associates reflect the customers and communities we serve. Four out of five associates feel emotionally committed to our company. Their outstanding performance in 2018 enabled 100% of our stores to qualify for Success Sharing bonus payments to non-management associates. We offer training and development that transforms jobs into careers; 90% of our store leaders began as hourly associates.

**Operate Sustainably**

Our partnerships with suppliers allow us to give our customers access to hundreds of products that are good for their homes and good for the environment. In 2018, our energy-saving products enabled customers to cut their energy consumption by 10 billion kilowatt hours, equivalent to eliminating emissions from more than 2 million cars. Our water-saving products allowed customers to reduce consumption by 59 billion gallons.

In our operations, we continued efforts to use less energy. From 2010 to 2018, energy consumption at our U.S. stores dropped 26%, even as our store count grew over that time.

We are strengthening our communities by giving back financially and through associates’ Team Depot volunteering — a hallmark of who we are. In 2018, the Home Depot Foundation increased our long-standing commitment to veterans by pledging an additional $250 million, meaning we will give half a billion dollars to support veteran causes by 2025. Associates contributed their time and energy to these causes, too. During our Celebration of Service in the seven weeks leading up to Veterans Day 2018, our people volunteered 100,000 hours to support veterans.

But we can always do more. On Page 11 you’ll see the goals we’ve set for doing our part to build a better business and world.

The creativity and commitment of our associates and suppliers make The Home Depot successful. Thank you for your interest in our progress and our plans for improvement.

**Strengthen Our Communities**

Craig Menear
Chairman, Chief Executive Officer and President
A variety of stakeholders are interested in how we run our business. Customers ask us questions when they walk into our stores or shop with us online. Citizens contact us with concerns. We meet with shareholders and non-governmental organizations (NGOs). We take part in industry efforts to raise awareness about the social and environmental responsibilities we all share.

These interactions may be informal or formal, as detailed in our Materiality Assessment Framework on the following pages. Together with our regular materiality assessment, they help us gauge the impact of our business, set priorities, measure our progress and design ways to improve.

Our Sustainability Council, composed of representatives from different areas of the business, oversees our approach to sustainability. The Council focuses on seven key areas, as shown on the right.

The Council meets twice a year, and its chairman presents our sustainability strategy and activities to the Board of Directors annually. Our priorities and plans are communicated through our company structure from leaders to associates.

This understanding of our impact and collaboration with our stakeholders enables us to set objectives that improve the sustainability of our operations and maximize our influence in developing sustainable products for our customers.
Associates

"I want to contribute to a values-based company."

Customers

"Perform due diligence on your products to build my trust."

NGOs

"Work with us to elevate our causes to action and progress."

Academia

"Give us insight into customer trends and habits to aid our research."

Suppliers

"Give us an outlet to market innovative, sustainable products and a way to gather timely customer feedback."

Investors

"Tell us your material risks and how you handle oversight of them."

Government

"Create partnerships with local, state and federal officials that help bridge industry innovation to public policy advancement."
# Materiality Assessment Framework

This chart outlines the process The Home Depot uses to assess, prioritize and address material sustainability issues.

## Step 1
Identify Potential Sustainability Issue (examples)

- Chemicals
- Circular Economy
- Fuel Cells
- Global Warming
- Human Capital Management
- Invasive Plants
- Organics
- Pollinator Health
- Rainforest Depletion
- Recycled Content
- Renewable Energy
- Worker Well-Being

## Step 2
Trigger Materiality Assessment

Material Issues Identified by The Home Depot

## Step 3
Engage Relevant Internal Business Teams

- Corporate Communications
- Government Relations
- Human Resources
- Information Technology
- Investor Relations
- Legal
- Merchandising
- Operations
- Real Estate & Construction
- Supply Chain

---

FAQ: MEASURING OUR PROGRESS

Vice President of Environmental Innovation Ron Jarvis has spent nearly two decades working with stakeholders to drive sustainability progress at The Home Depot. Some of the frequently asked questions he responds to give insight into our efforts to improve and regularly measure progress.

Q. People around the globe increasingly focus on the connection between carbon emissions and climate change. How does The Home Depot monitor its carbon emissions?

A. We have been tracking our carbon emissions since 2009 using metrics that are industry standards:
   - Scope 1: Direct emissions from combustible sources and refrigerants
   - Scope 2: Indirect emissions from purchasing electricity
   - Scope 3: Emissions from upstream transportation and distribution of freight

Through our efforts and focus we have reduced our absolute carbon emissions by over 3 million metric tonnes since 2009. This was achieved amid significant growth — from $66 billion in sales in 2008 to $108 billion in 2018. Learn more on Page 44.

Q. Do you track the impact of water- and energy-saving products sold at The Home Depot?

A. Our biggest environmental impact comes from the products we sell. We track and report on the results that come from our customers choosing more eco-friendly products. We are ahead of our stated goals to help customers cut greenhouse gas emissions by 20 million metric tonnes and reduce water use by 250 billion gallons by 2020 through the purchase and proper use of our consumption-reducing products. Find out more on Page 64 and Page 66.

Q. What is The Home Depot’s Wood Purchasing Policy, and how have you adapted it as the world’s forests have changed?

A. We established our Wood Purchasing Policy in 1999 to help guide our suppliers in sourcing sustainable wood. We work with many stakeholders to understand ongoing global forestry issues and update our policy accordingly. In 2018, we increased protections for forests in Papau New Guinea, the Solomon Islands, the South American Amazon Basin and the African Congo Basin. Learn more on Page 54.

Q. Does The Home Depot have consistent global workplace standards for suppliers — regardless of where their factories are located?

A. We formalized our supplier standards in 2002. These standards apply to all suppliers in all countries and cover 14 categories, including worker safety, hours and wages, underage labor and more. In 2018, we performed a combined 3,011 factory audits and follow-up visits to supplier sites. Read more on Page 50.
Q. How does The Home Depot select which product categories to focus on to address environmental concerns?

A. Every year we review our major product categories to identify largest volumes. We then assess stakeholder feedback and concerns and prioritize potential environmental improvements that could have the greatest impact. In addition, we continually assess and address stakeholder concerns, even for small-volume product categories, to guide improvements throughout the year. Read more about how we work with stakeholders on Page 6.

Q. What does The Home Depot's Eco Options product classification mean?

A. Our Eco Options® program identifies products that have less of an impact on the environment than comparable standard products. It’s our effort to better define and clarify manufacturers’ green claims. Just knowing the potential impact of certain products or how we use them can help all of us make better choices about how we use energy, water and chemicals in our homes. Thousands of people go through our doors every day, which puts us in a unique position to educate customers about products that are good for their homes and the environment. Discover more about Eco Options and our Chemical Strategy on Page 58.
2018 HIGHLIGHTS

Our core values and orange-blooded culture benefit our associates and the communities we serve.

FOCUS ON PEOPLE

4 out of 5 associates feel emotionally committed to The Home Depot

See Page 28

In 2018, our workforce was

44% minority
38% female

See Page 25

95% of associates contributed to The Homer Fund — built by our people for our people in need

See Page 36
**OPERATE SUSTAINABLY**

U.S. store energy use decreased **26%** compared to 2010, putting us ahead of our stated goal to reduce consumption.

See [Page 46](#)

We set a science-based target to achieve

- **40%** reduction in emissions by 2030 and
- **50%** reduction by 2035

See [Page 11](#)

Under our responsible sourcing policy, we conducted

- **1,362** factory audits and
- **1,649** follow-up visits in 2018

See [Page 50](#)

**STRENGTHEN OUR COMMUNITIES**

For the first time, we publicly identified **10** U.N. Sustainable Development Goals that align with our sphere of influence

See [Page 108](#)

Since 2011, associate volunteers and Home Depot Foundation funds have helped improve more than **41,000** veterans’ homes or facilities

DIVERSITY & INCLUSION

A diverse and inclusive workplace is about much more than measuring data. At The Home Depot, it is an integral part of our culture. It’s the right thing to do, and it’s also good for our business. People from different backgrounds bring different perspectives and ideas to our company, and that cultivates innovation.

We actively integrate diversity and inclusion into every aspect of our business. Our associates and our suppliers, our product selection and the services we offer — all reflect our aim to create a workplace and company that reflects the communities we serve. Associate feedback helps us gauge progress. Through our Voice of the Associate Survey, we ask for and act on associates’ assessments of our workplace.

Our commitment to diversity and inclusion was established almost 40 years ago in our eight core values. We remain committed to those values and to fostering an environment where our associates, customers and suppliers are valued and respected.

DID YOU KNOW?

In 2018, over 40% of promotions were earned by minority associates, and over 45% were earned by female associates.

Hiring

Our inclusive practices make The Home Depot a great place to work and shop. We are intentional in our efforts to build a workforce that reflects the communities in which we do business, even as demographics shift.

We also lead by example through diversity on our Board of Directors and executive team. Here are some of the ways we foster an inclusive workplace:

- The Home Depot career website offers candidates a view of the company’s commitment to diversity and inclusion.
- We post openings on diversity-focused job boards to increase diversity among applicants.
- We regularly participate in diversity-related career fairs around the nation.
- We use social media, traditional advertising in multicultural markets and other outreach to target prospective associates.
- Our University Relations program recruits interns from diverse backgrounds. In 2018, more than 327 students participated in our summer internships across 12 business areas. Half of those interns were ethnically diverse, and a third were women.
- We connect with veterans and their spouses through our military transition portal. More than 35,000 veterans are employed by The Home Depot.
Retention & Promotion
All employees prosper through our robust development opportunities and benefits, but we structure some programs specifically to support workforce diversity. Here are a few examples:

- Respect training is part of all associates’ curriculum.
- All of our new leaders receive unconscious bias training as part of their leadership curriculum. In 2018, all officers received this training.
- All hiring managers receive training about removing bias from the interview process.
- All salaried leadership positions require diverse slates of candidates.
- Our chief diversity officer provides strategic leadership in developing a workplace where all associates are valued, respected and supported in doing their best work.
- Our talent-planning process is designed to help identify diversity gaps.
- Our Leaders Inclusion Network (Lead-IN) empowers associates to lead inclusively by engaging and championing diverse talent. We held over 135 Lead-IN events in 2018, attracting approximately 7,800 participants. Our Women in Leadership curriculum is among the developmental content available to associates under Lead-IN.
- In 2018, our Mentoring Circle Program, which fosters inclusion, drew participants that were over 45% ethnic minority and over 50% female.
- Tuition reimbursement includes learning other languages.
- Medical coverage includes transgender benefits.
Building a Diverse Workforce

Our diverse workforce of over 400,000 associates strengthens our competitive advantage and reflects the customers we serve. A comparison against U.S. Department of Labor data shows that our workforce is more ethnically diverse than the nation’s working population. These charts reflect the demographics of The Home Depot’s U.S. workforce in 2017 and 2018.

LEARNING & DEVELOPMENT

The Home Depot strives to build a learning-rich workplace where associates and leaders are prepared to succeed, motivated to serve our customers well and given opportunities to grow. Our learning and development programs expand skills and capabilities so associates can master their roles, which ultimately leads to great customer experiences.

We develop our associates and leaders using:

- **E-learning**: Media-rich, self-directed learning offers focused, interactive activities and actionable feedback.

- **Instructor-led experiences**: Immersive training at our Atlanta Store Support Center and field locations focuses on business acumen; technical skills; and leadership skills for new leaders in critical positions.

- **Online resources**: Our library of online, on-demand resources includes videos, courses, book summaries, reference materials and performance-support tools.

- **Executive development**: Advanced business and leadership training empowers experienced leaders to develop strategic business approaches and prepare for higher-level roles.

- **Mobile learning**: On-demand content inside the work stream guides associates in assisting customers. Hands-on activities improve learning retention.

**BY THE NUMBERS**

- More than 90% of store leaders began as hourly associates

- There were nearly 21 million course completions in 2018

- That adds up to 6 million hours of associate training
DID YOU KNOW?

We expanded summer internships to college students already working in our stores and other locations. Our Field-to-SSC program accounted for 10% of the interns who explored careers at our Store Support Center in 2018.
ASSOCIATE ENGAGEMENT

Engaged associates care about their work and the performance of The Home Depot. They work with enthusiasm and understand that their efforts make a difference. Associate engagement is the emotional commitment our associates have to our company and our goals. Engagement is vital to The Home Depot’s culture and to our success.

Voice of the Associate Survey
We create an engaging workplace by asking and acting on associate feedback. Our annual Voice of the Associate survey helps us determine how emotionally connected our associates are to the company, their jobs, coworkers and leaders. The survey data and associate feedback are used to help improve associate experiences. Over 310,000 associates participated in the most recent survey. The results show that, on average, four out of five associates feel emotionally committed to The Home Depot. Female and minority associates rate our company at 80% or better for our commitment to diversity and inclusion.

Success Sharing & Bonuses
Our philosophy of taking care of our people and motivating them to deliver a superior customer experience shapes our profit-sharing program for hourly associates. Success Sharing provides semi-annual cash awards for performance against our business plan, including sales and productivity goals. The program has granted awards totaling more than $1 billion to associates over the last five years.

The outstanding performance of our associates in fiscal 2018 enabled 100% of stores to qualify for Success Sharing in both the first and second half of the year. This resulted in bonus payments to our non-management associates of approximately $222 million.

In 2018, we also paid a one-time bonus of up to $1,000 to our U.S. hourly associates related to the expected benefit from U.S. tax reform. In addition, we established a merit increase budget for our associates of between 2.5% and 3%.

+ DID YOU KNOW?
Team Depot associate volunteers have made a difference in over 4,100 U.S. cities since 2011. Learn more on Page 98.
**Associate Resource Groups**
For more than 12 years, our **Associate Resource Groups** (ARGs) have engaged associates and supported an inclusive culture. Championed by executive sponsors and advisers, each group is connected to a single aspect of diversity.

Our ARGs support the company’s business objectives and policies, particularly related to developing our associates, creating diversity awareness and engaging diverse community partners. In addition, associates in all of our locations are empowered to hold diversity events based on our companywide inclusion calendar.

**BY THE NUMBERS**

- Associate Resource Groups sponsored **60+** events in 2018
- The ARG events drew **12,000+** participants in 2018
- More than **60%** of Store Support Center associates belong to an ARG
Our people make The Home Depot successful, and it’s our responsibility and privilege to take care of them. In 2018, we launched an updated parental leave policy that gives six weeks of 100% paid leave to all parents, plus an additional six weeks of 100% paid maternity leave to all birth mothers. This launch also included other enhanced benefits like Milk Stork, a breast milk delivery service for traveling mothers. Read more in the Spotlight on Page 33 about how parental leave is benefiting associates.

Associates are at different life stages, and in 2018 we launched Benefits4U to guide them to the right resources. With one click, associates can find support for wherever they are on life’s journey. For example, the money module is the place to go for help with personal finance education or retirement planning. The elders module provides guidance on everything from finding caregivers for aging parents to negotiating the complexities of Medicare.

**Financial Programs & Tools**

**FutureBuilder 401(k):** Associates can save for the future while taking advantage of tax savings. Eligible associates who contribute to the plan get up to 3.5% in matching contributions from the company.

**Employee Stock Purchase Plan (ESPP):** Twice-a-year plans provide a 15% discount on Home Depot stock. Associates who enroll may set aside up to 20% of eligible pay (up to $21,250 annually) to purchase stock.

**Personal finance education:** All associates have access to the Momentum onUp Financial Confidence Program. Momentum onUp consists of a suite of online webinars, activities, tools and resources leading participants through an eight-step program. Momentum onUp is designed to help associates increase knowledge and relieve financial stress by building financial confidence.

**Alight Financial Advisors®:** Independent advisory services help associates gauge whether they’re on track for retirement.

**Insurance:** To prepare for the unexpected, associates have access to policies for medical care, disability, life, home, auto and pet health insurance.

**Identity theft protection:** Associates are automatically enrolled in free AllClear ID® identity repair services, and they can sign up for additional proactive identity monitoring at a reduced rate.

**Discounts:** Associates receive special rates on a wide variety of everyday goods and services — from nursery items to mobile phone service, gym memberships, computers, vacations and more.

BENEFITS

Associate Assistance
CARE/Solutions for Life: Our free and confidential employee assistance program helps associates manage personal and work-life challenges. Licensed counselors and medical professionals are available by phone 24/7/365 to help associates and their household members, including spouses, domestic partners, other relatives and roommates.

Program team members assist with specific interventions that meet the everyday needs of our workforce — from childcare to eldercare, marital concerns, bereavement, emotional stress, legal or financial concerns and more. In addition, CARE/Solutions for Life is available to assist our management teams dealing with disaster relief and responding to traumatic events in the workplace or community.

Family Support
Paid parental leave: Associates with at least one year of service who are having a baby, adopting or fostering a child can take six weeks of paid parental leave. Birth mothers are eligible for an additional six-week paid maternity benefit.

Years Ahead™: Associates have access to resources to plan for their elders, including referrals to memory and hospice care facilities and independent and assisted-living communities.

Adoption assistance: The Home Depot reimburses certain adoption-related expenses to assist eligible associates.

Milk Stork®: Associates who are breast feeding and must travel for work can use this specialized delivery service to send breast milk home to their babies.

Rethink: Best-practice resources and training help associates support their children with developmental disabilities or challenges with learning and behavior. The comprehensive program provides access to easy-to-follow videos, custom learning plans, a training center and one-on-one sessions with licensed experts.

Back-Up Care: We’ve partnered with Bright Horizons® to offer eligible associates back-up care when:

- Regular caregiver/stay-at-home spouse is unavailable
- Associate is between childcare or adult/eldercare
- Child’s regular childcare center/school is closed
- Associate is transitioning back to work after returning from leave
- Child or adult/elder relative is ill or needs assistance
- Associate is on business travel or relocating
- Associate or spouse is recovering from surgery

Sittercity®: An extensive database of background-checked babysitters, nannies, elder companions, pet sitters and housekeepers is available to associates.

MetLaw®: This legal-assistance voluntary benefit provides consultation and document review for issues from adoption to wills, powers of attorney, divorce, nursing home agreements and more.
SPOTLIGHT:
PARENTAL LEAVE GIVES DADS AND NEWBORNS TIME TO BOND

Meet two fathers who took advantage of The Home Depot’s updated parental leave policy to spend time with their families. Bonding with their newborns helped them at home and at work.

First-Time Parents Welcome Three
Matt Sullins and his wife had a big surprise when they went in for an ultrasound. “We saw there were actually two babies. We were in shock for 10 minutes,” Matt said. Then came another surprise. “The technician’s eyes got big, and we said, ‘Is that a third baby?’”

His wife spent the final 10 weeks of the pregnancy on bed rest, so Matt, a garden associate in Flowery Branch, Georgia, started preparing to take paid parental leave. “With multiples, you don’t know when your babies are going to be born,” he explained.

When Piper, Roman and Blakely were born at full-term in July, Matt’s leave began immediately. His time at home gave his wife an opportunity to rest and recover. It also allowed the first-time father get to know his children. “I was able to bond with the kids,” he said. “There’s nothing like waking up and taking them downstairs, knowing that you get to spend the entire day with them.”

Matt was initially anxious about returning to work, but it was a smooth transition. “When I got back, I was able to hit the ground running,” he said, “and the team here was happy to see me back.”

Getting Past the ‘Mental Block’
Shay Thomas became a dad for the third time in November when his son, Micah, was born. “For my previous two [children], I didn’t have more than 14 days away,” said the district manager for northern Connecticut.

His wife was thrilled about The Home Depot’s updated parental leave policy, but Shay was initially hesitant to take advantage of the benefit. “I prided myself on being a guy who didn’t take time off. I had to get past the mental block.”

Shay’s regional vice president, a champion of the updated policy, encouraged him to take parental leave. Shay was able to help care for his wife while she recovered from childbirth, take his older kids to school and help transition Micah into the family.

Meanwhile, back at work, associates who had stepped up to cover his duties gained confidence and demonstrated their ability to lead. “That will help us over the long term,” Shay said.
BENEFITS

Educational Assistance

EdAssist®: Associates have access to academic and college financial advisers to assist them in reducing the time, cost and stress of pursuing their educational goals. This program also includes access to tuition discounts at more than 200 educational institutions nationwide.

Orange Scholars: This extension of The Homer Fund offers scholarships to qualified children of associates based on financial need, academic performance, community involvement and leadership. Financial need is the highest consideration.

College savings plans: Associates can review college savings information; use a tool to define their criteria; compare selected 529 college savings plans in their states; and start the application process.

College Coach®: Counselors and online resources guide associates and their families through the college-admissions process and help them create financial strategies for educational costs.

Healthy Life

Health Challenge: Our annual competition encourages associates to take action to improve their health, feel better and have fun. Associates set personal goals and compete to win prizes.

Flu prevention: Free flu shots are available for associates to protect them and our customers during cold and flu season.

Health screening: Associates have access to biometric screenings on-site or at a Quest Diagnostic Patient Service Center.

Tobacco cessation: Personalized, one-on-one strategies and support are available to help associates mentally and physically prepare to quit.

Sleepio®: Personalized program is available to help associates discover their sleep scores and reach their sleep goals, so they can be at their best at home, work and in the community.

24/7 care: Associates and family members they care for — including elderly parents — have access for a discounted fee to Teladoc® virtual doctor services for minor illnesses and behavioral health issues from home anytime, including after hours, on weekends and during holidays.

Health care support team: Grand Rounds® helps associates navigate health care for themselves and their family members. Associates also may receive a medical second opinion through Grand Rounds.

DID YOU KNOW?

Over 60,000 associates have received more than $142 million in tuition reimbursement since 2005.
BY THE NUMBERS

We began our annual health challenge in 2011
THE HOMER FUND

When our associates face unforeseen hardships, The Homer Fund® is there to help. Our charity provides emergency financial assistance to associates when they need it most. Powered by associate contributions, The Homer Fund helped more than 7,700 associates in 2018 through grants that collectively totaled over $13 million.

A Board of Directors governs The Homer Fund, and associates oversee its daily operations. The company pays for operating costs; 100% of all donations go toward grants. The Fund receives more than 1,000 requests each month to help associates manage the financial pressures of an unexpected emergency or life-changing event.

When disasters strike, The Homer Fund supports affected associates. We’re there for them as they go above and beyond for customers living through the aftermath of hurricanes, wildfires and earthquakes. In 2018, The Homer Fund gave more than $1 million to assist associates affected by natural disasters.

Orange Scholars, an extension of The Homer Fund, offers scholarships to qualified children of hourly associates based on financial need, academic performance, community involvement and leadership. Financial need is the highest consideration.

138,000+ associates have been helped by The Homer Fund since 1999
SPOTLIGHT: EASING THE FINANCIAL BURDEN OF A MEDICAL EMERGENCY

Soon after joining The Home Depot, Ray Ferry learned about The Homer Fund and began donating. As a veteran, he saw parallels between the company’s core value of taking care of our people and ideals he practiced during his 20 years in the military as a medic.

“In the Army, it’s all the same,” he said. “It’s being part of a huge, huge family. You have a brother or a sister to your left or to your right, and they look out for you, and you look out for them. That’s how it is with The Home Depot.”

Ray’s life changed when he was rushed to an emergency room with early stage organ failure. Doctors put him in an induced coma for a month and a half, during which he underwent six abdominal surgeries.

Ray’s store manager applied for a Homer Fund grant on his family’s behalf. The financial support helped his wife and daughter with living expenses while Ray was recovering. “It was such a relief to know that somebody else cared enough about not only me, but my family, also,” he said.

“It’s being part of a huge, huge family. You have a brother or a sister to your left or right, and they look out for you.”

— Raymond (Ray) Ferry, Store 939
ASSOCIATE SAFETY

The Home Depot never stops striving to create a safer working and shopping experience for our associates and customers. We make progress through training associates and reinforcing safety best practices; more than 90% of associates underwent InFocus safety training in 2018.

Our store leaders are engaged in promoting safety in our aisles. And we reduce risks through innovation. Our injury rates are consistently lower than industry averages for our retail class. Read more about our progress in the Spotlight on the following page.

Note: Annual data reported in previous years, including in the 2018 Responsibility Report, is restated above to account for maturity of claims.
Our people are our most important asset, and in 2018 we took an entrepreneurial approach to improving their safety.

Helping New Associates Stay Injury Free
We increased new associates’ safety with a training program designed just for them. New associates kept learning after their initial training by participating in monthly InFocus training modules. The modules detailed best practices for avoiding injuries and kept safety top of mind.

Those fundamentals were reinforced by store leaders who met with new hires to explain the importance of injury prevention and The Home Depot’s commitment to their safety.

Over 150,000 associates received this specialized new-hire training in 2018. The result: a 7% reduction in injuries among new hires, compared to 2017.

Engineering Against Risk
Our Store Support Center and field teams continually collaborate to create processes and tools that make the associate experience safer. In 2018, their innovation was a small but powerful lift-assist tool that lets a single operator load a bulky, heavy item into a customer’s vehicle with very little ergonomic demand on the body.

The tool, which is akin to a portable loading dock, does the lifting for the associate. We co-developed it in partnership with a supplier and rolled it out to about 20 stores in 2018. More stores are getting the device in 2019.

Being There for Injured Associates
We put a lot of energy into safety awareness and injury prevention, but injuries still occur. Part of how we live The Home Depot values is by being there for associates.

In 2018, we began a process of fostering formal conversations between store leaders and injured associates. Our goals: learn from what happened, prevent recurrence and reinforce to our associates that they are the company’s most valuable resource.
DATA SECURITY

The Home Depot values and respects the privacy of its customers and visitors. Our Privacy and Security Statement provides information about how we collect, use and share information we collect from our customers and visitors.

We leverage the National Institute of Standards and Technology (NIST) Cybersecurity Framework as the foundation of our cybersecurity program. As cybersecurity attackers become increasingly more sophisticated, our program prioritizes threat mitigation, while focusing on maintaining the integrity and resiliency of our systems. We invest in our ability to identify, protect and detect security risks within our environment.

In the event that we identify a security issue, we have defined procedures to respond and recover as quickly as possible. Overseeing our efforts on a day-to-day basis is our Information Technology Security team, led by an officer-level chief information security officer. Our approach enables us to drive a collectively secure culture.

Governance, Risk & Compliance
- The Home Depot has a Data Security and Privacy Governance Committee, composed of a cross-functional group of senior leadership, that oversees the security and privacy of customer and business information.
- Information security and privacy policies are in place and periodically reviewed.
- Targeted audits and penetration tests are conducted throughout the year by internal and external entities.
- We are compliant with the Payment Card Industry Data Security Standard.
- We engage an industry-leading third party to independently evaluate our information security maturity on an annual basis.

Data Protection
- The Home Depot has established data classification and retention policies focused on limiting the risk of unauthorized exposure of customer, associate and business data.
- Data protection strategies are in place and focused on data devaluation and data access monitoring.
- Sensitive data attributes are classified into domains with defined security expectations for data-at-rest and data-in-transit.

Vendor Security
- The Home Depot’s vendor risk management program works to classify service provider or business partner risk based on several factors, including, but not limited to, data type accessed and/or retained.
- Service provider or business partner security risk assessments are conducted for targeted relationships.
- Where applicable, service providers and business partners are contractually obligated to protect restricted data provided by or received from The Home Depot.

Security Awareness
- Security and privacy training and awareness are provided to all associates, and additional customized, role-based training and awareness are provided to targeted internal audiences.

The Home Depot uses the GHG Protocol Corporate Accounting and Reporting Standard, which has been adopted by over 90% of Fortune 500 companies to calculate metric tonnes of greenhouse gas emissions and efforts to reduce them. We continually review and refine our emissions measurements to reflect changes to our business and improvements in data collection and reporting.

We participate in the CDP® reporting process. CDP, formerly the Carbon Disclosure Project, is an independent, international, nonprofit organization that provides a global system for companies and cities to measure, disclose, manage and share environmental information.

We received a score of A from CDP for our latest report, reflecting our high level of action on climate change mitigation, adaptation and transparency in 2017. CDP also named our company an industry leader.

In 2018, we set a science-based target goal linked to our annual CDP reporting. We committed to reducing carbon dioxide emissions 2.1% per year to achieve a 39.9% reduction by 2030 and a 50.4% reduction by 2035. Our progress will come from continually improving energy efficiency in our operations and expanding our investments in renewable and alternative energy. In our U.S. stores, we reduced our energy use by 98 million kilowatt hours in 2018.

### 2018 Results

**SCOPE 1:**
Direct emissions from combustible sources and refrigerants totaled approximately 515,000 metric tonnes.

**SCOPE 2:**
Indirect emissions from purchasing electricity totaled approximately 1,649,000 metric tonnes.

**SCOPE 3:**
Emissions from upstream transportation and distribution of freight totaled approximately 2,865,000 metric tonnes.
PROTECTING THE CLIMATE

ENERGY USE

We constantly strive to improve the sustainability of our operations because it’s good for our business and for the planet. Our efforts to increase operational efficiency and reduce our environmental impact have multiplier effects that drive innovation and benefit communities.

When we invest in technologies that supply new sources of energy or reduce consumption, we increase the viability of those solutions. The smart energy choices we make today contribute to a greener future.

Prioritizing Conservation
The simplest way to reduce emissions from energy use is to use less energy. In 2018, electricity consumption by our U.S. stores was 26% less than in 2010. That put us ahead of our stated 2020 goal to achieve a 20% reduction in store kilowatt hour energy use, compared to 2010 consumption. In 2018 alone, U.S. store energy consumption dropped 2.9%.

Our results come from making improvements kilowatt by kilowatt. In 2018, we installed energy-efficient heating, air-conditioning and ventilation systems in 133 stores. Over the last seven years, we’ve updated HVAC units in 467 stores.

We’ve upped the ante on LED lighting. A few years ago, we began retrofitting lighting from 6- to 4-lamp LED fixtures — ultimately upgrading lights in over 1,300 stores. We learned from those improvements, and in 2018, we installed even more efficient LED lights above the aisles and garden centers of 295 stores. The energy-saving results so far have been impressive. We’re collecting additional data in 2019 as we expand LEDs to more stores.

We continue to benefit from earlier initiatives to install upgraded building automation systems in all U.S. and Canadian stores and add variable frequency drives (VFDs) to more than 600 stores. VFDs conserve energy by ensuring equipment uses only the electricity needed to meet immediate HVAC demands.

Balancing Energy Supply and Demand
More than 750 stores participate in demand mitigation to help balance power supply and demand. Here’s how it works: During peak demand, utilities or grid operators strategically divert electricity from some of our stores, reducing the chance of regional outages and optimizing the price we pay for electricity.

In addition, we use on-site batteries to store electricity during off-peak times for use when demand rises. At the end of 2018, batteries were in place at 10 stores in California. We’re installing more in 2019.

Our U.S. stores reduced energy consumption by 98 million kilowatt hours in 2018, even as we added a new store to our footprint. LED lights contributed significantly to the savings.
BY THE NUMBERS

In 2018, U.S. stores’ energy use was 26% less than in 2010.

On-site alternative or renewable energy projects were operating at 256 stores by the end of 2018.

750+ stores participate in demand mitigation programs.
**PROTECTING THE CLIMATE**

**ENERGY USE**

**Leveraging Alternative and Renewable Energy**

We support and tap into sustainable energy that’s produced off-site and on-site. All of these sources bring us closer to our goal of leveraging 135 megawatts of alternative and renewable energy by 2020. In addition, when The Home Depot buys or produces energy from renewable sources, we strengthen the business case for such alternatives.

- **Off-site wind**: In early 2017, we became a customer of the Los Mirasoles Wind Farm northeast of McAllen, Texas. The energy purchased from the farm is enough to power 90 stores. We also purchase power from the Zopiloapan Wind Farm in central Mexico.

- **Off-site solar**: We partner with solar energy providers in Delaware, Massachusetts and Minnesota. Our support boosts the viability of solar power in these areas.

- **On-site solar**: We began 2018 with 13 small-scale solar farms atop U.S. stores, and we ended the year with 45. Rooftop solar takes advantage of the soccer field-size space at the top of our big boxes. Each solar farm reduces the store’s annual electricity grid demand by an estimated 35% or more. That’s the equivalent of powering 2,300 average U.S. homes for a year. Our goal is to have sun-fueled power plants on more than 50 U.S. stores.

- **Fuel cells**: Where rooftop infrastructure won’t support solar panels, we’re looking at other alternative energy options, including fuel cells. These mini power plants cut polluting emissions significantly — in some cases by 50% — compared to using traditional power sources. By the end of 2018, fuel cells were operating outside 202 stores — 26 more locations than the year before. The fuel cells produce more than 90% of each store’s electricity needs. More fuel cell installations are underway in 2019.

**CHECK IT OUT**

Discover how The Home Depot’s purchase of wind power supports renewable energy innovation.
DID YOU KNOW?
We buy enough energy from the Los Mirasoles Wind Farm in Texas to power 90 stores.
SOURCING RESPONSIBLY

ETHICAL SOURCING

We owe it to our customers, associates and communities to further the collective commitment to human rights, safety and environmentally sound practices through ethical sourcing. We engage our suppliers in this commitment by prioritizing the purchase of products made in factories that adhere to our responsible sourcing standards. We report on our progress in an annual Responsible Sourcing Report.

Our responsible sourcing standards mandate that suppliers and factories abide by all applicable international and local laws, rules and regulations in the manufacturing and distribution of merchandise or services provided to us. We conduct audits around the world to ensure compliance with our responsible sourcing standards.

Suppliers must keep on-site documentation that demonstrates compliance with our responsible sourcing standards. They also must allow Home Depot associates and/or representatives full access to production facilities, worker records, production records and workers for confidential interviews in connection with monitoring visits. We expect our suppliers to promptly correct any non-compliance, starting with timely preparation and presentation of a corrective and preventative action plan.

If suppliers fail to improve, we may terminate our business relationships with them. Equally important, we support factories that take action to create lasting social and environmental compliance programs. We encourage suppliers and factory workers to communicate concerns via processes outlined in our corporate Code of Conduct.

Our responsible sourcing audits are designed to assess compliance in these areas:

- Laws and regulations
- Child labor
- Forced labor
- Harassment and abuse
- Compensation
- Hours of work
- Non-discrimination
- Freedom of association and collective bargaining
- Health and safety
- Environment
- Subcontracting
- Communication
- Business ethics
- Monitoring and compliance

---

BY THE NUMBERS

Under our responsible sourcing policy, 1,362 factory audits and 1,649 follow-up visits were conducted in 2018.

We audited peak production compliance at 258 factories that make seasonal goods.

72 subcontractors were audited in 2018.
RESPONSIBLE SOURCING STARTS AT THE TOP

BOARD OF DIRECTORS AND/OR AUDIT COMMITTEE review our responsible sourcing program annually

ENTERPRISE RISK COUNCIL of senior company leaders provides oversight and guidance, as needed

INTERNAL AUDIT associates conduct annual audits to ensure our responsible sourcing program is effective and operating as expected

THIRD-PARTY AUDITORS conduct our responsible sourcing compliance audits

HOME DEPOT GLOBAL SOURCING OFFICES work with our supply chain to ensure compliance with our standards

THE HOME DEPOT RESPONSIBLE SOURCING TEAM of associates make sure factories adhere to our standards
SOURCING RESPONSIBLY

CONFLICT MINERALS

Our company expects all suppliers that manufacture our products to provide appropriate information and conduct due diligence to enable our compliance with conflict minerals laws. We also expect these manufacturers to obtain products and materials from suppliers that are not involved in funding conflict in the Democratic Republic of the Congo (DRC) and adjoining covered countries. We partner with our private brands and proprietary product suppliers whose products contain tin, tungsten, tantalum or gold (referred to as 3TG) to identify the source of any of these minerals in the supply chain.

2018 Progress
As detailed in The Home Depot’s Conflict Minerals Report for 2018, our efforts focused on collecting and disseminating information about sourcing practices of our suppliers. We cataloged that information in a database using the conflict minerals reporting template developed by the Responsible Minerals Initiative® (formerly the Conflict-Free Sourcing Initiative, or CFSI).

We continued to refine our supplier review processes for suppliers by excluding any that merely affixed company brands, trademarks, logos or labels to generic products manufactured by a third party, as permitted by U.S. Securities and Exchange Commission guidance. As a result, in-scope Tier 1 suppliers decreased to 153 in 2018 from 212 in 2017.

Through our due diligence process, which aligns with guidance from the Organisation for Economic Co-Operation and Development, we received 100% participation from our in-scope private brands and proprietary-product Tier 1 suppliers.

Thirty-four percent of our Tier 1 suppliers indicated that one or more conflict minerals were necessary to the functionality or production of covered products. Of the smelters or refiners reported by these suppliers, only 52 out of a total of 312 sourced conflict minerals from covered countries. All of these smelters or refiners were certified as DRC conflict-free by the Responsible Minerals Initiative, the London Bullion Market Association and/or the Responsible Jewellery Council. However, a small number of suppliers below the Tier 1 level were unable to complete chain-of-custody surveys back to the level of the smelter or refiner.

We continue to work closely with our suppliers to ensure they implement responsible sourcing; obtain current, accurate and complete information about the supply chain; and encourage their smelters to obtain a “conflict-free” designation from an independent third-party auditor.
DID YOU KNOW?
In 2018, 100% of our in-scope private brands and proprietary-product Tier 1 suppliers participated in our efforts to collect conflict minerals information.
As one of the world’s largest home improvement retailers, we have the ability to promote sustainable forestry through the wood products we sell.

To help protect endangered forests and ensure there will be timber for future generations, we formalized a Wood Purchasing Policy in 1999.

We do not accept wood products from Papau New Guinea, the Solomon Islands, the South American Amazon Basin or the African Congo Basin, unless the Forest Stewardship Council® (FSC) has certified the products. FSC certification ensures products come from responsibly managed forests that provide environmental, social and economic benefits.

The net loss of forests continues to slow; 17% of the world’s forests are now in legally established protected areas, according to the United Nations’ Food and Agriculture Organization.

**NORTH AMERICA**
Most wood products sold by The Home Depot are sourced from North American forests. The United States now grows more trees for wood than anytime in the last 60 years, according to data from the U.S. Department of Agriculture.

**SOUTH AMERICA**
Less than 4% of our wood products come from South America. Most of those products are from pine plantations in Chile and Brazil.
Less than 1% of our wood products come from Europe. The region has steadily increased its forestland over the last century.

Less than 3% of our wood products come from Asia. China has grown its net forest coverage by 50 million acres since 1990.

Less than 1% of our wood products are from Africa. Any wood from the Congo Basin must be FSC certified.

Less than 1% of our wood products come from Oceania.

Percentages shown on map are approximate.

Source: U.N. Food and Agriculture Organization, *State of the World’s Forests*
Our multiyear supply chain synchronization initiative, called Project Sync, continues to improve the way we store and move products. Project Sync incorporates and builds on clean transportation best practices throughout our supply chain. That omnichannel approach and our focus on sustainability earned The Home Depot a spot on Gartner Research’s list of the Top 25 corporate supply chains in 2018.

Reducing Emissions Intensity
In late 2017, we announced our company would invest $1.2 billion to update equipment, technology and infrastructure across our supply chain to meet customers’ evolving demands. In 2018, some of those improvements began to take shape. They’re helping us reduce our carbon dioxide emissions intensity. That means we’re lessening the environmental impact of our each mile our goods travel, even as our business grows.

Our supply chain leverages green technologies like hydrogen fuel cells, which produce off-the-grid power that doesn’t create polluting emissions. More than 170 fuel cells power forklifts at our direct fulfillment center in Troy Township, Ohio. At our stocking distribution center in Savannah, Georgia, over 130 fuel cells do the job. Combined, these fuel cells save nearly 4 million kilowatt hours of electricity a year.

Reporting Our Results
We participate in the U.S. Environmental Protection Agency’s SmartWay® program to collect and report greenhouse gas emissions data from corporate supply chains — and we encourage others to, as well. We require all Home Depot carriers to be SmartWay partners, and we audit our carriers annually to ensure their data is properly submitted to the EPA. We are a six-time recipient of the SmartWay Excellence Award.
REDDUCING ENVIRONMENTAL IMPACT

GREENER PRODUCTS

The Home Depot partners with our suppliers to address global environmental concerns related to our products, including carbon emissions, water scarcity, air quality, waste and more.

**Eco Options**
Our Eco Options program helps our customers identify products that have less of an impact on the environment and encourages our suppliers to provide more sustainable offerings. We launched Eco Options in 2007 in partnership with SCS Global Services, a leading, independent, third-party certification body that validates environmental claims. Today, we offer more than 25,000 Eco Options products.

For a product to receive Eco Options classification, the supplier must document attributes that prove it has less of an impact on the environment than comparable products in the same category. Until all industries create and abide by a reporting formula that measures product attributes according to a common sustainability standard, we will continue to use our Eco Options program to help customers sort through green product claims.

**Chemical Strategy**
Our Chemical Strategy, first published in 2017 and detailed on the following pages, is an important part of our commitment to offer greener products. It guides our efforts to work with suppliers to reduce the indoor air quality impact of chemicals used in the products we sell. Its publication was a milestone made possible by what we had learned over a decade of focusing on sustainability.
At The Home Depot, we recognize the responsibility we have for the environmental impact of our organization — and that our biggest impact is the products we sell. In partnership with stakeholders throughout the supply chain, The Home Depot is committed to offering products that are safer for the environment.

With our encouragement, our suppliers have been investing in developing environmentally innovative products. The Home Depot supports the work of the Green Chemistry & Commerce Council (GC3) through annual membership and participation in the Retail Leadership Council of the GC3, and we participated in developing the GC3’s Joint Statement on Using Green Chemistry and Safer Alternatives to Advance Sustainable Products.

We and our suppliers also partner with respected third-party certification organizations and environmental nonprofits that guide the home improvement industry toward safer chemical ingredient use. The Home Depot is committed to continuing the drive toward minimizing the environmental impact of the products we sell.

Our Chemical Strategy, first published in 2017, is informed by what we’ve learned over more than a decade of focusing on sustainability.
Painting Products

**Paints**
As a result of our paint suppliers’ efforts over the last 10 years to evolve their paints and offer products that help maintain healthier air quality, the paints we sell have significantly improved. The following chemicals of concern are excluded or are scheduled to be excluded from our interior and exterior latex water-based wall paints in our U.S. and Canada stores:

- Triclosan
- Isocyanates
- Formaldehyde
- Lead/heavy metals
- Alkylphenol ethoxylates and nonylphenol ethoxylates (APEOs and NPEs) are in the process of being phased out by the end of 2019.

**Certifications:** In our U.S. stores, all Behr® interior paints, Glidden® Premium, Glidden Diamond™ and PPG® Timeless® interior paints are GREENGUARD® Gold certified. All BehrPro® interior paints and Behr Primers are MPI X-Green certified.

**Paint-Tinting Colorants:** In 2012, we transitioned our paint-tinting colorants in our U.S. and Canada stores from solvent-based formulation to a water-based, low-VOC and ethylene-glycol-free formulation.

**Volatile Organic Compounds:** All of our interior and exterior latex water-based wall paints in our U.S. stores are zero or low VOC. The majority of interior and exterior latex water-based wall paints in our Canada stores are zero or low VOC, and our full assortment will be zero or low VOC by December 2020.

Our current U.S. and Canada zero- and low-VOC paints are outlined here:

Note: Colorants added to base paints may increase VOC level, depending on color choice.

**DID YOU KNOW?**
All interior and exterior latex water-based wall paints in our U.S. stores have low or no volatile organic compounds (VOCs).
REDUCING ENVIRONMENTAL IMPACT

CHEMICAL STRATEGY

Flooring

Carpet
Home Depot carpet suppliers have been at the forefront of the industrywide removal of chemicals of concern and the exploration of safer alternatives in carpet. All indoor wall-to-wall carpet sold through The Home Depot’s U.S. and Canada stores have a third-party verification of transparency through DECLARE® Label or Environmental Product Declarations (EPDs), or certification of material health through Cradle to Cradle™ Products Innovation Institute or CRI Green Label Plus®. The following chemicals of concern are excluded from indoor wall-to-wall carpet sold in our U.S. and Canada stores:

- Perfluorooctanoic acid (PFOA) or perfluorooctane sulfonate (PFOS)
- Triclosan
- Organotins
- Ortho-phthalates
- Vinyl chloride
- Nonylphenol ethoxylates (NPEs)
- Coal fly ash
- Formaldehyde
- Added heavy metals

Vinyl
Home Depot vinyl flooring suppliers are setting the pace for change in this category with efforts to continually improve the chemical profile of their products. As of January 2016, no ortho-phthalates are permitted as added plasticizers in vinyl flooring sold at Home Depot stores in the U.S. and Canada.

Laminate Flooring
Laminate flooring at The Home Depot is verified by either GREENGUARD Gold or FloorScore® certification to contain 0.0073 ppm or less of formaldehyde, which is a stricter standard than the EPA TSCA Title VI of 0.05 ppm.

Insulation

Our fiberglass insulation suppliers have persistently challenged themselves to remove chemicals of concern from their products over the last decade. As a result, 100% of our fiberglass insulation products in the U.S. and Canada are GREENGUARD Gold certified and do not contain the following chemicals of concern:

- Brominated flame retardants
- Halogenated flame retardants
- Antimony trioxide
- Formaldehyde
- Added heavy metals

Residential Household Cleaning Chemicals

The Home Depot continues to work with suppliers to improve products that impact indoor air quality. As a result, we are asking our suppliers to exclude the following chemicals of concern from the manufacturing of all residential household cleaning chemical products sold in Home Depot stores by the end of 2022:

- Propyl-paraben
- Butyl-paraben
- Diethyl phthalates
- Dibutyl phthalates
- Formaldehyde
- Nonylphenol ethoxylates (NPEs)
- Triclosan
- Toluene
- Trichloroethylene (TCE)

In addition, our Eco Options program identifies environmentally preferred products, including cleaners that have obtained certifications from independent third-party testers such as EPA’s Safer Choice and Cradle to Cradle.
The Home Depot encourages suppliers to make the products we sell more energy efficient, and our partnership with the U.S. Environmental Protection Agency’s ENERGY STAR® program supports those efforts, too. Customers who use our energy-saving products reduce their power bills and significantly decrease their households’ greenhouse gas emissions.

In 2018, we offered over 22,000 ENERGY STAR products in stores and online, and we sold more than 231 million units of these products. This furthered our stated goal to help our customers save $2.8 billion in energy costs by 2020 through the purchase and proper use of ENERGY STAR products. Our company is an 11-time ENERGY STAR award winner.

We promote energy-conservation awareness in our stores and online. For example, our popular DIY workshops teach customers how to use affordable energy-efficient products and offer ways to incorporate simple conservation practices into their household routines.

**REDUCING ENVIRONMENTAL IMPACT**

**ENERGY-SAVING PRODUCTS**

The Home Depot encourages suppliers to make the products we sell more energy efficient, and our partnership with the U.S. Environmental Protection Agency’s ENERGY STAR® program supports those efforts, too. Customers who use our energy-saving products reduce their power bills and significantly decrease their households’ greenhouse gas emissions.

In 2018, we offered over 22,000 ENERGY STAR products in stores and online, and we sold more than 231 million units of these products. This furthered our stated goal to help our customers save $2.8 billion in energy costs by 2020 through the purchase and proper use of ENERGY STAR products. Our company is an 11-time ENERGY STAR award winner.

We promote energy-conservation awareness in our stores and online. For example, our popular DIY workshops teach customers how to use affordable energy-efficient products and offer ways to incorporate simple conservation practices into their household routines.

**BY THE NUMBERS**

- We estimate customer purchases of ENERGY STAR products in 2018 helped reduce energy use by **10 billion kilowatt hours**.
- That was an estimated reduction of **7 million metric tonnes** of carbon emissions.
- Customers saved an estimated **$1.2 billion+** in annual energy utility costs through purchases and proper use of ENERGY STAR products.
We understand the responsibility The Home Depot has in protecting water resources — not only through our operations, but also through the products we sell. We work with suppliers to encourage conservation innovations, and we’ve committed to helping customers save 250 billion gallons of water by 2020 through the purchase and proper use of our products.

Home Depot products that bear the EPA’s WaterSense® label have been independently certified to perform well and help save water, energy and money. In 2018, we offered more than 9,000 WaterSense products in store and online, and we sold over 18 million units of those products. Our company has been a WaterSense Partner of the Year seven times since 2011, receiving Sustained Excellence awards in three of those years.

We also encourage protection of water resources in the communities we serve. For example, in Northern California, The Home Depot has partnered for 15 years with Our Water Our World (OWOW), a program organized by pollution-prevention agencies to protect local waterways. Across the country in Maine, we’ve partnered with the Cumberland County Soil and Water Conservation District’s YardScaping program since 2014 to educate customers on how to minimize polluted runoff into area waterways.

**REDUCING ENVIRONMENTAL IMPACT**

**WATER-SAVING PRODUCTS**

**DID YOU KNOW?**

All toilets sold in our stores bear the WaterSense label.

**BY THE NUMBERS**

We estimate customers saved $655 million+ on annual water utility costs in 2018 through the purchase and proper use of WaterSense-labeled products.

Those products helped save over 59 billion gallons of water in 2018, according to our estimates.

Showerheads sold in our U.S. stores have a maximum flow of 1.8 gallons per minute, which is better than the WaterSense standard.
REDUCING ENVIRONMENTAL IMPACT

GARDENING

We know that yards, patios and balconies are more than outdoor spaces — they’re ecosystems that have an impact on their surroundings. That’s why The Home Depot works closely with our growers and suppliers to offer healthy trees, blooms and edible plants that support local environments and pollinators. We’re excited about meeting customers’ growing demand for organic and environmentally beneficial plants.

**Organic Edibles**

We’re making it easier for our customers to grow organic. We now offer more than 50 varieties of organic, non-GMO vegetable and herb plants grown according to methods approved by the U.S. Department of Agriculture (USDA) National Organic Program. Only products that have been certified as meeting the USDA's organic production and handling standards may carry the USDA Organic seal.

**Native & Healthy Plants**

Native plants contribute to the health of ecosystems and pollinators. Our growers work closely with U.S. states’ departments of agriculture to identify invasive plants that may threaten local native plants.

**Growing Local**

Each region in which we operate has a unique ecosystem with its own weather patterns, soils and growing challenges. We are proud to partner with 250 local growers who carefully balance the impact of their production with local environmental issues. These partnerships reduce transportation costs and carbon dioxide emissions, and they enable us to offer affordable selections of plants and trees — while supporting the local economies of communities we serve.
DID YOU KNOW?
Our garden centers get plants from 250 local growers.
GROWING GREEN

Our organic product assortment carries some of the industry’s most recognized and respected brands.

**ALASKA®**
Fish has been used as a natural source of plant nutrients for centuries. Alaska Fish Fertilizer provides a rich source of organic matter that breaks down and releases nutrients into the soil to enhance the strength and vigor of plants.

**AVENGER®**
These organic herbicides, fertilizers and pesticides are certified organic and don’t contain chemicals or synthetic ingredients that can harm people, animals or the environment. Avenger weed killer is an EPA-approved, eco-friendly way to kill post-emergent weeds, grasses and broadleaves.

**BONIDE®**
Made with natural ingredients, Bonide’s BurnOut Formula II is safe for use around people and pets, doesn’t translocate and, when used as directed, will only affect plants sprayed with the solution. It’s a great option for safe, effective, non-selective weed control.

**BURPEE®**
Burpee Eco-Friendly Organic Concentrated Seed Starting Mix is an excellent soil alternative made from coconut coir, a renewable resource made from the husks of harvested coconuts. This product is 100% biodegradable and is listed by the Organic Materials Review Institute (OMRI) for organic use.

**DR. EARTH®**
Sustainably made using human and feed-grade ingredients, Dr. Earth’s 100% organic and natural fertilizers contain no genetically modified organisms (GMOs), are people and pet safe and are listed as approved for use by California Certified Organic Farmers.

**ECOSCRAPS®**
Ecoscraps repurposes leftovers from all parts of the food life cycle. This reduces landfill waste while creating an all-in-one particle organic nutrition source for vegetables, fruits and flowering plants.
Organic plant food for indoor and outdoor plants is Espoma’s specialty. Products feature long-lasting biotone and natural ingredients. The company has been making organic and natural lawn and garden products since 1929.

The company’s blend of Biozome organic plant nutrients and beneficial microbial species are uniquely combined to enhance soil conditions and stimulate plant growth. Jobe’s fertilizers feed roots all season long.

A 92-year-old, family-owned manufacturer of organic soils and fertilizers, Kellogg has been focused on sustainability since 1925. The company invests in rigorous organic growing practices and ensures every product is certified organic.

The Performance Organics line from Miracle Gro delivers fast results using eco-friendly ingredients. These products are OMRI-listed for organic gardening.

Miracle Gro Nature’s Care fertilizers and pest controls are formulated for organic gardening. Soils with Water Conserve natural ingredients absorb water to protect against dryness or overwatering.

We offer organic gardening DIY workshops to teach customers how to grow healthy and productive plants using eco-friendly products.
SPOTLIGHT: REDUCING SINGLE-USE PLASTIC IN THE GARDEN

For more than 10 years, the Home Depot has been participating in the Plant Pot Recycling Program, which helps our customers reduce and recycle plastic used for their gardens. We ask customers to bring back the plastic pots that hold plants they buy at our garden centers across the U.S. Then we send the pots back to growers, who return them to our stores with new plants for sale.

When the pots are no longer usable, program partner East Jordan Plastics recycles them into new pots, trays and hanging baskets. This creates a closed-loop solution to reducing plastic — also called the circular economy. The Home Depot is the largest retail contributor to the program, which recycled about 15 million pounds of plastic in 2009 and now recycles more than 33 million pounds a year.

Recycling plastic containers recovers more than 60% of the energy tied to initial production and diverts waste from landfills. It streamlines the supply chain, too. Shipping racks now have a two-way purpose. They travel back to plant nurseries filled with pots that the suppliers can reuse.

In 2018, we returned enough plant pots for recycling to fill more than 800 15-yard dumpsters — keeping all that plastic out of landfills. 

We accept containers with these resin codes in our Plant Pot Recycling Program:

- **HDPE**
  - No. 2
  - High Density Polyethylene

- **PP**
  - No. 5
  - Polypropylene

- **PS**
  - No. 6
  - Polystyrene
REDDING ENVIRONMENTAL IMPACT

CLEANING

The Home Depot offers environmentally preferred cleaners for every household cleaning task – with third-party certifications that validate claims, including non-toxic, biodegradable, no harmful chemicals, plant-based and not tested on animals. These certifications are vital to helping consumers choose products that meet their environmental standards for a healthy home.

- **Cradle to Cradle**
  - Certifies manufacturer’s commitment to improving what products are made of and how they’re made

- **Leaping Bunny label**
  - Certifies no animal testing in manufacturing

- **GREENGUARD® Indoor Air Quality Certified**
  - Meets emissions standards for helping reduce indoor air pollution and risk of chemical exposure

- **SAFER CHOICE**
  - Identifies products that use safer chemical ingredients without sacrificing performance

- **SCS Global Services**
  - Suite of eco-labels certify environmental stewardship, social responsibility and quality

- **USDA Certified Biobased Product**
  - Assures a USDA-verified amount of renewable biological ingredients
Method® products are made with non-toxic, naturally derived formulas and never tested on animals. Bottles are made with recycled plastic. The company’s permanent lines of laundry, personal and home-care products are Cradle to Cradle certified.

In 2013, Method reincorporated as a benefit corporation and formally integrated its mandate for sustainability into the company’s mission. This unique corporate structure enables Method to balance profits with environmental and social responsibility.

Method’s factory in the Pullman Park district on the South Side of Chicago features on-site renewable wind and solar energy generation.

The factory is home to a 75,000-square-foot garden where local urban agriculture company Gotham Greens® operates a commercial-scale greenhouse that produces about 500 tons of fresh, pesticide-free produce annually for the local community and surrounding retailers and restaurants.
Rejuvenate® products are GREENGUARD certified, which means they’re recognized as having low chemical emissions and improving the quality of the air in which they’re used. The company’s non-toxic floor cleaner is free of harsh fumes and smells.

Breathe® aerosol cleaners are made only from ingredients that meet EPA Safer Choice criteria. The company’s non-toxic bathroom cleaner has no ammonia and no butane. It’s powered by air, making it an eco-friendly choice for families and pets.

CLR Brands® aims to formulate products that are safe for consumers and the environment. The company’s commitment to eco-friendly products has helped it earn the U.S. Environmental Protection Agency’s Safer Choice Partner Award multiple times. The woman-owned company also is among THD’s more than 3,400 small and diverse suppliers.

Scotch-Brite by 3M™ offers the Greener Clean Non-Scratch Scrub Sponge made with 100% plant-based fibers, half from the agave plant. It outlasts 30 rolls of paper towels and is packaged in 100% recycled material.

Mrs. Meyer’s Clean Day® home and personal care products are made with plant-derived ingredients and essential oils. The products are not tested on animals, earning them Leaping Bunny certification. They’re formulated without artificial colors, ammonia, chlorine bleach and parabens, and they’re packaged in bottles made of at least 30% post-consumer recycled content.

Our customers’ demand for clean, sustainable energy is growing as residential solar energy systems become more available and affordable than ever before. Our partnerships with Sunrun® and Vivant Solar® make it easier for our customers to access clean energy by capturing the power of the sun at home.

The solar energy systems from both of our suppliers are able to send excess power from customers’ homes back to the electric grid. That enables the whole community to benefit from clean power from the sun. Some utilities even offer solar credits to customers, essentially buying the extra solar power their homes produce.

Since 2016, our solar partners have installed more than 280,000 kilowatts of clean energy through our solar program.

We’re also empowering customers’ energy independence by offering home battery energy solutions in all 50 U.S. states. The batteries provide reliable power, even during storms and outages.

Our solar program installed systems at 18,000+ homes in 2018.

Those systems gave our customers the capacity to produce 94,000+ kilowatts of solar energy.

Our customers’ solar power had the capacity to reduce carbon dioxide emissions by 90,000 metric tonnes, equivalent to removing 19,000+ cars from the road for a year.
DID YOU KNOW?
The amount of sunlight that strikes the earth’s surface over 90 minutes could fuel the world’s energy consumption for a full year.

Source: U.S. Department of Energy
The Home Depot’s packaging team works with our private-label product suppliers to apply science to creating better packages. Our goals are to reduce package footprints and use more sustainable materials.

The innovations we achieve are good for the environment and for our business. We cut down on waste, boost shipping efficiency and reduce damage to products.

Using Less EPS
In 2018, our packaging team continued a multi-year effort to find substitutes for expanded polystyrene (EPS) foam. EPS foam is good at protecting products, but it contains beads of chemicals and oil that are often difficult to recycle and can take more than 500 years to biodegrade.

We’re replacing EPS with recyclable materials like molded pulp and paper in some private-label packaging. In 2017, we eliminated 341,000 cubic feet of EPS foam from our packaging. In 2018, we eliminated more than 517,600 cubic feet — enough to keep six Olympic-size swimming pools of EPS foam out of landfills.

Reducing PVC
Polyvinyl chloride (PVC) film is widely used in packaging. The thin, rigid synthetic plastic polymer is molded around products to protect them from damage. But, like EPS, PVC film is difficult to recycle and takes a long time to biodegrade. In 2018, our packaging team eliminated 1.6 million square feet of PVC film from private-brand packaging, enough to cover 28 football fields.

BY THE NUMBERS

In 2018, THD redesigned 134 packages to reduce size and materials.

We estimate our packaging innovations abated 600,000 pounds of damaged-product waste in 2018.

Smaller packages saved nearly 770,000 cubic feet of shipping space in 2018.
SPOTLIGHT: HOW WE’RE MAKING PACKAGES SMALLER, STRONGER AND MORE SUSTAINABLE

Our Husky® LED Work Light is a popular product among DIYers and Pros, and that made it a great candidate for a high-impact package redesign in 2018.

The new package footprint is 25% smaller.

The smaller, lighter package improves shipping efficiency, thereby reducing polluting emissions. It also reduces waste going to landfills and saves shelf space in our stores.

Paper-based molded pulp replaced expanded polystyrene foam, eliminating 22,000 cubic feet of EPS in just one year.

The new materials are stronger. Damaged-product returns are half of what they were with the previous packaging. That cuts waste and business costs.
The Home Depot is committed to properly managing waste and hazardous waste. We partner with vendors to constantly improve how we reduce, reuse and recycle waste.

Hazardous Materials Disposal & Handling
We constantly seek sustainable methods of disposal. In 2018, our company recycled or reused for energy 34% of the hazardous waste generated from our operations and customer returns. We properly disposed of the remaining waste.

Associate Training & Resources
All associates receive training on recognizing hazardous materials. Associates responsible for managing storage and cleanup of hazardous materials complete additional in-depth environmental compliance training.

Information about and guidance for the cleanup, classification, labeling and storage of hazardous waste is available to associates through company-issued handheld devices and our associate intranet site.

Preventative Actions
We take specific steps to avoid spills and contamination across the store with particular focus on these areas:

Garden center—Proper handling of fertilizer and pesticides bags, including checking for and properly repairing damaged bags

Receiving and central storage—Appropriate procedures for handling, accumulating, storing, labeling and inventorying hazardous waste and separating potentially incompatible materials

Inspections of key areas—Routine inspections of garden areas, parking lots and store entrances identify potential problems; scheduled sweeps of fertilizer aisles and parking lots protect against hazardous materials entering the environment

Responsive Actions
If a spill does occur, we have the following resources in place to properly address it:

Spill kits and containers—Located throughout each store for prompt and effective cleanup and disposal of hazardous materials such as paint, solvents, aerosols, oil, fuel, pesticides and fertilizers

Emergency response—Third-party consultant provides an emergency response team available 24/7 to assist with hazardous materials cleanup and, if necessary, provide remediation services

**RECYCLING TO REDUCE WASTE**

**LEAD-ACID BATTERIES**
We recycle lead-acid batteries used in THD operations and dropped off by customers. Figures below represent the number of battery cores.

The Home Depot opened our first store in Canada in 1992. Today, we employ more than 30,000 associates and operate 182 stores across 10 Canadian provinces. We provide products tailored to local communities and cater to DIYers and Pros.

Our focus on associates, customers and communities has helped us earn recognition as one of Canada’s best diversity employers for 10 years in a row. In 2018, we were recognized for our sustainable product selection and sustainability improvements in our operations.

We work with utilities to help customers conserve energy and save money. Our partnerships with colleges, universities and learning centers help us to attract diverse talent. We’re particularly proud of the work we do to end youth homelessness in Canada.

**Bringing Housing & Hope to Homeless Youth**

Since 2014, The Home Depot Canada Foundation has supported more than 700 charity organizations and invested more than CA$20 million in initiatives designed to prevent and end youth homelessness. By 2022, that investment will grow to CA$50 million. Below is a snapshot of the leading Canadian charity partners that the Foundation works with to address this important issue:

- 360°kids Support Services (Markham, ON)
- A Way Home Canada Coalition (Toronto, ON)
- Boys and Girls Clubs of Calgary (Calgary, AB)
- Canadian Alliance to End Homelessness (Calgary, AB)
- Canadian Observatory on Homelessness (Toronto, ON)
- Choices for Youth (St. John’s, NFLD)
- Covenant House Vancouver (Vancouver, BC)
- Dans la rue (Montreal, QC)
- Egale (Toronto, ON)
- Eva’s Initiatives (Toronto, ON)
- Phoenix Youth Programs (Halifax, NS)
- Raising the Roof (Toronto, ON)
- Resource Assistance for Youth (Winnipeg, MB)
- Youth Empowerment and Support Services (Edmonton, AB)
- Youth Services Bureau (Ottawa, ON)

To learn more visit: [www.orangedoorproject.ca](http://www.orangedoorproject.ca)
We helped divert nearly 270,000 pounds of household, power tool and cellphone batteries from landfills through our customer collection program in 2018.

LED retrofits completed in our Canadian stores in 2018 save enough energy to power 2,000 homes for a year.

2,400+ associates volunteered for more than 200 community service projects in 2018.

BY THE NUMBERS
The Home Depot began operating in Mexico in 2001, and now we have 124 stores across all 32 states. We employ more than 16,000 associates; in 2018, they collectively received more than 900,000 hours of training. We sell over 25,000 products in stores and over 21,000 online, including more than 350 designated with the Hipotecha Verde eco-friendly label.

For 12 consecutive years we have been recognized for our corporate social responsibility efforts in Mexico, including our support of ethical business and labor practices, our community involvement and our efforts to reduce environmental impact.

Our Orange Fund provides financial assistance to Mexican associates in need. It’s similar to The Homer Fund that assists U.S. associates. In 2018, the Orange Fund helped 146 associates with expenses related to health care or disaster recovery.

Giving Back
2018 was a year of working together to support the communities we serve:

- Our Team Depot projects focused on schools and communities. We helped build community centers, green areas and playgrounds.

- We helped house seven families through a home-building partnership with TECHO and Construyendo.

- We donated 96 million pesos (US$4.8 million) in merchandise to nongovernmental organizations dedicated to helping our communities’ most vulnerable people.

- We joined forces with 22 suppliers to participate in the United for Housing Program in October and collected more than 3 million pesos (US$150,000) in donations. The funds will help build 66 homes for families in need.

- We continued working to aid recovery of families affected by the September 2017 earthquakes in Mexico. By the end of 2018, we had participated in the reconstruction of 159 homes.

2018 Recognition

Labor equality and nondiscrimination

Responsible business practices

Family-supportive workplace

Inclusive business practices
BY THE NUMBERS

80% of our vendors are local companies based in Mexico.

In 2018, associates took part in 790 projects through Team Depot.

In 2018, we recycled or reused 987,431 wooden pallets.
STRENGTHEN OUR COMMUNITIES

SUPPORTING DIVERSITY

Business Organization Partnerships
We maintain memberships, participate in trade shows and provide sponsorship support to a number of local, state and national business organizations, including groups that specifically target diverse businesses, such as:

- Georgia Minority Supplier Development Council
- Minority Business Development Agency
- National Center for Indian Enterprise Development
- National Gay and Lesbian Chamber of Commerce
- National Minority Supplier Development Council
- U.S. Department of Veterans Affairs
- U.S. Hispanic Chamber of Commerce
- U.S. Pan-Asian American Chamber of Commerce
- Women’s Business Enterprise National Council

Community Partnerships
Our local and national community partners represent the diversity of our associates and customers. To further The Home Depot’s commitment to promote inclusion, develop talent and engage with diverse communities, we strategically partner with aligned organizations, including:

- 100 Black Men of Atlanta
- American Corporate Partners
- Catalyst
- CEO Action for Diversity & Inclusion
- Executive Leadership Council
- Hispanic Association on Corporate Responsibility
- Human Rights Campaign
- Martin Luther King Jr. Center for Nonviolent Social Change
- National Action Network

- National Association for the Advancement of Colored People
- National Association of Asian American Professionals
- National Association of Chinese-Americans
- National Council of Negro Women
- National Urban League
- Network of Executive Women
- Rainbow PUSH Coalition
- Trumpet Awards Foundation
- Urban League of Greater Atlanta
- United Negro College Fund

Supplier Diversity
We provide meaningful business opportunities for minority-, veteran-, LGBT- and female-owned businesses, as well as small businesses. These suppliers enable us to offer innovative products and services, meet the needs of our diverse customer base and support economic growth in the communities we serve.

CHECK IT OUT
Meet Carol Nance, CEO of woman-owned rug and carpet supplier Nance Industries, based in Calhoun, Georgia.
3,400+ small and diverse businesses were among our suppliers in 2018

The Home Depot spent $6 billion+ with small and diverse suppliers in 2018

In 2018, our diverse supplier count grew 10% compared to the year before

Woman-owned Nance Industries, a THD supplier, has been in business since 1972.
**SPOTLIGHT:** MINIMIZING WASTE AND MAXIMIZING SELF-SUFFICIENCY BOOST SUPPLIER’S SUCCESS

Pure Beauty Farms is among the 250 local growers working closely with The Home Depot to supply locally grown plants to stores. Brothers Henry and Victor Yanes, whose family fled Cuba in the early 1960s, have expanded their business alongside The Home Depot for more than two decades.

The main operation for this minority- and veteran-owned diverse supplier is a 290-acre farm about 30 miles from downtown Miami. Pure Beauty also has a Georgia farm with about 120 acres. Plants don’t travel far to reach Home Depot stores and customers’ homes across the Southeast.

“We are fortunate to be in this country. We came from a family of immigrants and worked hard from an early age.”

— Victor Yanes, Pure Beauty Farms

Recycling and reusing are part of the Yanes brothers’ business. They focus on minimizing waste and maximizing self-sufficiency. Pure Beauty generates its own compost. It uses torn-up asphalt from Miami’s highways as the foundation for greenhouse beds. The company manufactures its own greenhouses, which adds efficiency and speeds up recovery after hurricanes.

The Yaneses are thinking about who will lead Pure Beauty Farms in the future. Most of their children are in the business, and the brothers are working on a succession plan. “We feel blessed that The Home Depot has allowed us to do this for us and for our families,” Victor Yanes said. “You can’t get any luckier than that.”
SUPPORTING DIVERSITY

Retool Your School Grant Program
Since 2009, The Home Depot’s Retool Your School® campus improvement grant program has invested more than $2 million dollars to update, upgrade and uplift campuses of historically black colleges and universities (HBCUs).

Accredited HBCUs in the United States may apply to compete for Retool Your School grants to create sustainable renovations and additions to their campuses. HBCU supporters can vote for their favorite schools via Twitter and Instagram using the school’s designated hashtag or by going to retoolyourschool.com. In 2018, 67 HBCUs competed for the program, and nine won grants.

BY THE NUMBERS

$360,000
awarded in 2018 for campus improvement projects

499
grants awarded to HBCUs since the program’s inception in 2010

$2.1 million
has been distributed to HBCUs through Retool Your School grants since 2010

CHECK IT OUT
Discover how Retool Your School helped build a pavilion at Livingstone College in North Carolina.
Claflin University in Orangeburg, South Carolina, used Retool Your School funds for campus improvements.
The Home Depot Foundation works to:

- Improve the homes and lives of U.S. veterans
- Train skilled tradespeople to fill the labor gap
- Support communities affected by natural disasters

Support for Veterans
Since 2011, The Home Depot Foundation® has invested nearly $283 million to support U.S. veterans. In 2018, the Foundation committed an additional $250 million to veteran causes, taking the total to half a billion dollars by 2025.

Trades Training Program
The Home Depot Foundation has pledged $50 million to train 20,000 tradespeople by 2028 to help address the skilled trades labor shortage. As part of that commitment, the Foundation partnered with the Home Builders Institute (HBI) in 2017 to launch a 12-week trades-training program for transitioning military members, spouses and veterans. Active duty military members within 180 days of separation are eligible for the courses, which are taught at military bases. Participants pay no fees.

In 2018, 160 pre-apprentices graduated from the program, earning industry-recognized credentials. Graduates also received job-placement support. In 2019, the Foundation and HBI are expanding the program to more military bases.

The Home Depot Foundation also has partnered with the Construction Education Foundation of Georgia in a separate trades-training program, Construction Ready Plus. This program trains residents of Atlanta’s Westside community to enhance careers in construction.

CHECK IT OUT
Learn more about the Foundation’s increased pledge to veteran causes — adding up to half a billion dollars by 2025.

BY THE NUMBERS

The Home Depot Foundation has awarded nearly $283 million to veteran nonprofit partners since 2011.

The Foundation has pledged to train 20,000 tradespeople by 2028.

The Foundation gave nearly $5 million in 2018 to help communities affected by natural disasters.
The Home Depot Foundation helps improve veterans’ homes across the United States.

**DID YOU KNOW?**
The Home Depot Foundation is investing $50 million to train tradespeople to help fill the labor gap.
TEAM DEPOT

Team Depot® is a force of 400,000 orange-blooded volunteer associates led by more than 2,200 community captain leaders, spanning all associate levels. Together with The Home Depot Foundation, Team Depot works to improve the homes and lives of U.S. military veterans and their families, as well as to aid communities affected by natural disasters.

Since 2011, associate volunteers and Home Depot Foundation funds have helped improve more than 41,000 veterans’ homes or facilities. We’ve made a difference in more than 4,100 U.S. cities.

Team Depot has received the U.S. President’s Service Award, the highest presidential honor given to volunteers. In 2018, Team Depot celebrated 25 years of giving back.

+ DID YOU KNOW?
Team Depot volunteers, many wearing military-green T-Shirts, gave 100,000 hours during our Celebration of Service in the seven weeks leading up to Veterans Day 2018.

CHECK IT OUT
Learn more about how Team Depot strengthens communities through the power of our people.

BY THE NUMBERS

Associate participation in projects for veterans rose nearly 30% during our 2018 Celebration of Service

More than 18,000 volunteers took part in Celebration of Service 2018

Team Depot volunteers have helped people in 4,100+ cities across the U.S. since 2011
DISASTER RESPONSE

When natural disasters hit the communities we serve, Home Depot stores are among the last to close and first to reopen as soon as it’s safe for our associates to return to work. That’s how we ensure our customers have what they need before and after disaster strikes.

Our merchandising, supply chain and operations teams work together to get products and equipment to areas of impact. We connect with the U.S. Federal Emergency Management Agency, state agencies, first responders, relief organizations and others to ensure we receive and provide credible information.

At our Disaster Response Command Center in Atlanta, merchandising, operations and supply chain teams work to get truckloads of products and supplies to stores in areas affected by natural disasters, particularly hurricanes. We take pride in setting the example for disaster preparation and recovery.

Through funds from The Home Depot Foundation and hands-on assistance from our crew of Team Depot associate volunteers, we help communities repair and rebuild. In 2018, The Home Depot Foundation gave nearly $5 million to support our nonprofit partners helping communities affected by natural disasters.

Our Homer Fund provides financial assistance for associates affected by disasters, including the wildfires, hurricanes and floods that devastated communities in the U.S. in 2018.

**DID YOU KNOW?**

THD Foundation, associates and partners renovated nine hurricane-damaged schools in Puerto Rico in 2018, part of a $1.2 million investment in the island’s recovery since 2017.

**BY THE NUMBERS**

We operated our Disaster Response Command Center for **37 days** in 2018.

The Foundation gave nearly **$5 million** in 2018 to help communities affected by natural disasters.

We delivered more than **2,600 shipments** of disaster-relief supplies to affected areas.

CODE OF CONDUCT

At The Home Depot, doing the right thing is embedded in our culture. That applies to how we serve customers, give back to communities, support our people and conduct our business. Our Business Code of Conduct and Ethics provides straightforward information about The Home Depot’s operating principles and offers tools to help associates make decisions that align with our ethical and legal obligations. The code applies to associates worldwide, and the company expects them to comply with the code and with all applicable laws and regulations in countries in which we do business. In particular, the code outlines The Home Depot’s ethical and legal standards in these areas:

- Safety
- Labor and employment
- Conflicts of interest
- Antitrust and fair competition
- Confidentiality, privacy and information protection
- Protecting the company’s assets and intellectual property
- Insider trading
- Financial integrity and reporting
- Records retention
- Environmental responsibility
- Foreign Corrupt Practices Act (FCPA) and anti-bribery
- Political activity

We empower associates to speak up when our ethical standards are not being met. We encourage them to voice concerns, express doubts, discuss problems and ask questions. In addition to sharing concerns with any member of their management team or a human resources partner, associates can report ethical or legal concerns to our Associate AwareLine, a 24/7 hotline. Reports can be made via thdawareline.com or through a live operator available in local languages. Associates may remain anonymous when reporting concerns. Reports are handled using a case management system. We have a longstanding policy that prohibits retaliation for making a report.

**Associate AwareLine**
1-800-286-4909

We also provide ways for suppliers, vendors, service providers and their workers to report concerns when they think our Home Depot values or compliance with the law may be compromised. Workers in all countries from which we source goods may submit anonymous reports via thdsupplieralertline.com. In addition, our Supplier AlertLine is answered by a live operator 24/7 in these countries and regions:

**Supplier AlertLine**
U.S. and Canada: 1-800-435-3152
Mexico: 001-888-765-8153
Asia: 86-400-880-1045
India: (Access Code) 000-117 (Dial) 800-435-3152

Our Business Code of Conduct and Ethics helps ensure our everyday decisions align with our ethical and legal obligations.
CORPORATE GOVERNANCE

The Home Depot has a long-standing commitment to strong corporate governance, which promotes the long-term interests of shareholders, strengthens Board and management accountability, and helps build public trust in the Company. We understand our responsibility to behave ethically, to understand the impact we have on people and communities, and to fairly consider the interests of a broad base of constituencies.

Our Board of Directors has adopted policies and processes that foster effective Board oversight of critical matters such as strategy, risk management, financial and other controls, compliance, culture and management succession planning.

At least once a year, our Board discusses our sustainability strategy and activities, including this report.

Leadership Structure
We believe having a combined chairman, CEO and president; an independent Lead Director; and Board committees composed entirely of independent directors currently provides the best Board leadership structure for The Home Depot.

This structure, together with other robust corporate governance practices, provides strong independent oversight of management while ensuring clear strategic alignment throughout the company.

Our corporate governance policies reflect best practices:

- Annual election of directors
- Majority voting standard in director elections
- Shareholder ability to act by written consent and call special meetings
- Shareholder right of proxy access
- Independent Lead Director
- Over 90% of directors and all Board committee members are independent
- Independent directors meet without management
- Mandatory retirement age for directors
- Annual Board strategy session and review of the company’s strategic plan
- Director overboarding policy
- No shareholder rights plan, also referred to as a “poison pill”
- Store-walk policy for directors
- Board education and orientation program
- Management succession policy set forth in Corporate Governance Guidelines
- Annual Board and committee self-evaluations, including individual director interviews with the independent Lead Director

Our proxy statement offers more details about corporate governance and risk management. Go to our Corporate Governance Overview for additional information on our corporate governance practices.
Board Committees
Our Board of Directors has established four standing committees, comprised solely of independent directors and governed by a written charter that sets forth its purpose, composition, powers, duties and responsibilities.

Board Oversight of Risk
The company has a robust framework designed to identify and ensure proper management of risk, including risk relating to our ability to operate responsibly and sustainably. The framework used to identify and manage risk considers enterprise-level issues, including competitive environment, brand and reputation, regulatory and compliance, and security. The framework also considers external and internal factors that could distract from or derail strategic objectives. The Board oversees risk through this framework, with oversight accomplished by identifying key risks and mapping them to the appropriate Board committee or to the full Board.

Our Board reviews these key risks and the related framework annually, and the full Board or appropriate Board committees discuss selected risks in more detail throughout the year. The table below identifies key risk areas overseen by the Board and its committees.

**FULL BOARD**
- Has primary responsibility for risk oversight, including approval of strategic objectives and defining risk appetite
- Delegates oversight of management of certain risks to Board committees
- Receives regular reports from the committees regarding risk-related matters

United Nations Sustainable Development Goals

The U.N. Sustainable Development Goals (SDGs) call for action to end extreme poverty, fight inequality and injustice and protect our planet. The plan, outlined in 2015, focuses on 17 areas in which nations, governments, businesses and citizens can work to achieve measurable results by 2030.

The Home Depot shares many of the same goals, which are articulated in our core values. We aim to continuously improve our products, our business and our operations to benefit our customers, associates, suppliers and communities by building a better workplace, business and world.

10 SDGs Align with the Home Depot’s Sphere of Influence

Good Health and Well-Being
- The Home Depot’s Eco Options program identifies environmentally preferred products for our customers.
- Our annual health challenge engages associates in activities to improve their overall health.

Gender Equality
- Our Women’s Link associate resource group promotes inclusion and professional development for female associates working at the SSC.
- Our Lead-IN program supports leaders’ efforts to champion female talent in the field.
- We proudly partner with the Women’s Business Enterprise National Council to promote gender equality among our suppliers.
- Our Corporate Governance and Code of Conduct policies detail our commitment to workplace equality.

Clean Water and Sanitation
- 100% of our in-store toilets, bath faucets and showerheads are high-efficiency products approved by the EPA’s WaterSense program.
- We estimate that our customers saved over 59 billion gallons of water in 2018 by properly using our water-saving products.
- Water reclamation tanks in 145 garden centers in our stores conserve water use.

Affordable and Clean Energy
- We purchase enough wind-generated energy to power 90 stores, and we operate alternative energy projects — such as rooftop solar panels and fuel cells — at more than 250 stores.
- Our partnership with the EPA’s ENERGY STAR program enabled customers to purchase products capable of reducing their energy use by 10 billion kilowatt hours in 2018 alone. That’s equivalent to removing more than 2 million cars from the road.
Decent Work and Economic Growth

- We employ over 400,000 associates internationally, and our supply chain has a total economic impact on millions of workers globally.
- We conducted 1,362 factory audits and 1,649 follow-up visits in 2018, focusing on worker health, safety and well-being in our suppliers’ operations.

Industry, Innovation and Infrastructure

- We partner with organizations such as the Coalition for Responsible Transportation Priorities.
- We have repeatedly earned the U.S. Environmental Protection Agency’s SmartWay Sustained Excellence Award for improving freight efficiency and contributing to cleaner air throughout our supply chain.
- The Home Depot Foundation has pledged $50 million to help train 20,000 tradespeople by 2028 to ease the skilled-labor shortage.

Sustainable Cities and Communities

- In 2018, we sold over $10 billion in sustainable products to our customers.
- Our emergency response team offers direct help after natural disasters. In 2018, we delivered more than 2,600 shipments of disaster-relief supplies to affected areas.
- The Home Depot Foundation has committed $500 million to support veteran-related causes by 2025.

Climate Action

- From 2009 to 2018, we reduced our carbon emissions by over 3 million metric tonnes.
- We have a current score of “A” from the Carbon Disclosure Project, which assesses action on climate change.
- In 2018, our U.S. store energy consumption was 26% less than in 2010, putting us ahead of our energy-use reduction goals.

Life on Land

- Our Wood Purchasing Policy helps ensure our suppliers and manufacturers support sustainable forestry.
- In 2018, we stopped accepting wood products from Papua New Guinea, the Solomon Islands, the South American Amazon Basin and the African Congo Basin, unless the Forest Stewardship Council has certified the products.
We have applied the Global Reporting Initiative (GRI) Sustainability Reporting Standards as an identification and cross-reference tool to make meaningful data accessible to our stakeholders. The following charts provide a cross-reference location guide to our reports.
